SUBJECT INDEX

Ablative materials 339
Aluminium in spacecraft 310
Apollo missions, crew weight loss 264
Astronomical satellite 189, 202
Attitude control 13, 31, 109
Attitude sensors 14, 198
Battery charge control 165
Beryllium technology 314
Black Arrow 1
attitude errors 233
attitude systems 39
control system 91
dynamic properties 237
flight mechanics 1
performance 7
pitch rates 235
spin-up 234
spring separation 236
stability and thrust 240
Carbon fibre reinforced plastics 327
structures 331
Carbon fibres 312, 327, 393
in rocket motors 337
Carbon pyrolytic 397
vitreous 397
Carpitron 251
principles of operation 252
telecommunication characteristics 257
Ceramic fabrication technology 353
Communication satellite design 50, 196, 442
Composites 397
Control system, Black Arrow 91
design 31, 47, 93, 110
electronics 115
theoretical studies 101

COSPAR Reference Atmosphere 1965 289
Cupping tests 415
Dehydration 263
'Earing' 424, 440
Ecological jurisprudence 266
Erosion of nozzles 403
Explosive forming 437
Geocentric motion 65
Gimbal arrangement 41
Graphites 396
chemical reactivity 404
Haley A.G. 266
Heliocentric motion 67
Hydroform pressing 430
Hyperbolic flight 60
Interstellar Golden Rule 267, 268
Ionosphere winds 275
LAS project 189, 202
Life, organic-inorganic systems 141
Magnesium in spacecraft 310
Manned space missions 261
Maraging steel 411
Mariner experiments 219
launch vehicle 217
spacecraft 214
Mars—1969 mission to 212
Materials in space 309
Mesosphere 293
Metalaw 266, 268
Metallic materials 310, 385
Meteorite damage 449
Microelectronic circuits 369
Motor cases 347
Multilayering process 374
Natural Law 266, 267
Non-metallic materials in spacecraft 311
Orbit, Secor 6 122
24-hour 442
Orbiting observatory 189
ground operations 202
Origin of life 141
Power requirements for satellites 159
Power supplies for TD1/TD2 satellites 157
Pressurization systems 83
Pressure vessels 347
Printed circuits, materials for 376
Propellant pressurization in Black Arrow 81
Re-entry 399
Reference for attitude sensors 25, 38
Refractory metals 385
Reinforced composites 358
Reliability of control systems 35
Resin properties of composites 329
Resistojet 390
Rocket motors, use of carbon fibres 337
nozzles 399

SAAB, Sweden 436
Satellite launcher design 176
power supplies 157
transponders 51
Scientific satellite design 174, 186
Secor 6 orbit 122
Silicon nitride ceramics 353
electrical properties 367
fabrication 355
mechanical properties 362
thermal properties 360
Solar array 161
Spacecraft, surface finishes 312
Space Law 266
Spinning body theory 243
Spinning satellite, tank configurations 223
Storage batteries 181
Textiles 396
Thermosphere, winds 300
Titanium in spacecraft 310
Transponder cooling 54
Tungsten 387
Valve systems 87
Weight loss of astronauts 261, 263
Winds at 95km altitude 75
Wind data, upper atmosphere 291
Wind velocity profiles 278, 280
